Dave,

For us to be clear to repair the sediment damage per our call today, if authorized, it would be best to have a bullet for:

- ☐☐ Repairing response related damage.

In the proposed action section.

At this late date I'm not sure if this is feasible. (this is a standard action item we put in all our AM's in R1 – yet this isn't a standard site by far).

Mike

Hello All:

Before this goes to HQ for final review, I wanted it to be reviewed from the Regions. I need your comments back by Monday, September 21 so that we can finalize this and have Region 8 forward on to HQ for a review prior to getting signatures. I am hoping there will not be significant issues since most have seen this as it has gone through development.

For Region 9, I am not sure exactly what the has been from the State of Arizona. Please make sure this is covered appropriately.

Thanks

Gary Moore

Federal On-Scene Coordinator
